# A Eurobloc for all systems.

Low in calcium with an inverted Ca/P ratio. With a high level of magnesium, the block is ideal for dry cows. Reduces the risk of milk fever and stress. Contains 175 Mg/Kg of chelated copper

Combination of calcium, phosphorus & trace elements to balance silage, maintain year-round fertility and production. Contains 175 Mg/Kg of chelated copper

Excellent levels of trace elements including copper, zinc, cobalt, iodine and selenium, to provide supplementary nutrition to maintain production and condition.

Zinc + iodine, cobalt and selenium, to help avoid setbacks and improve foot and skin condition. Contains chelated zinc

Unique Fix'N complex reduces ammonia production in the rumen, allowing protein optimisation, and with vitamin E-selenium improves fertility and immunity.

40% sodium bicarbonate to help buffer acidic winter feeds. Excellent trace elements levels, help maintain production and condition.

High magnesium mineral, suitable for cattle and dairy cows. 10% manesium balanced with calcium in a highly palatable form to prevent magnesium deficiency.
